

Cellular Blood Component Quality Monitoring EQA

As a participant in the UK NEQAS LI Low Level Leucocyte Scheme you may also be interested in the complementary Blood Component Monitoring Scheme, assessing red cell (RBC) and platelet (PLT) parameters, run by UKNEQAS Haematology.

Scheme details:

- UKAS Accredited to ISO17043
- Supplements the UK NEQAS Full Blood Count Scheme
- Monitors performance of Hb, HCT and platelet counts in therapeutic component ranges, beyond normal patient values
- Four distributions per year, each has 2 RBC and 2 PLT samples
- Up to 3 instruments for a single fee
- Performance monitored as a single instrument group against a consensus mean target
