

50 Years as World
Leaders in EQA
1969–2019

We are delighted to invite you to this pan-disciplinary scientific meeting in Dublin in UK NEQAS' 50th year of providing world-class external

quality assessment services to over 8,000 participating laboratories across the globe. The programme for this unique meeting focuses on how the patient depends upon quality at each stage of the testing process and how UK NEQAS is the EQA provider of choice to assist you in maintaining the quality in your laboratory. The 'Right First Time' case studies will be available in advance of the meeting so that you can test your knowledge and compare your answers to your peers.
