Haematological Malignancy Bone Marrow Aspirate Assessment (Not Accredited) programme

We are pleased to advise that we have made changes to the registration options for the Haematological Malignancy Bone Marrow Aspirate Assessment (HMBMAA) programme for the 2020/2021 financial year.

Currently, this programme is only available as an individual registration for CPD purposes. However, from 1st April 2020 it will be possible to register for HMBMAA in the following ways:

HMBMAA Individual

This option is for individuals wishing to take part in the programme for their own personal CPD purposes and who are paying for the registration themselves. It is not possible to register for this option in combination with any other programme. The invoicing address should be a personal address and no purchase order number is required.

HMBMAA Institute Individual

This option is for individuals wishing to take part in the programme for their own personal CPD purposes but their institute is funding their participation. It is not possible to register for this option in combination with any other programme. The invoicing address should be that of the institute finance department and a purchase order number is required.

HMBMAA 1-5 user license

HMBMAA 6-10 user license

HMBMAA 11-20 user license

These options are available for institutes who wish to enroll multiple people from their laboratory in the HMBMAA programme. The main laboratory can be included as one of the 'users' but this is not mandatory. Each person for whom a license is purchased will be allocated their own participant number with which to participate, but the institute will be invoiced centrally. NB if the main laboratory is included as a user in the HMBMAA programme it will be added to their general laboratory registration, a new participant number will not be issued in this instance. A 'supervisor' contact will also be added to each participant number associated with the license that has been purchased in order to link the labs together for invoicing purposes. This contact will also be responsible for re-registering the users in future financial years. If required, and on request only, we can also use this functionality to provide details of lab participation to the 'supervisor' including trial issues and confirming if results have been returned for each participant number associated with the license – please enquire about this service.

If one of these options is selected, UK NEQAS LI will contact you as part of the registration process to provide a spreadsheet on which you can enter the details of the participants. On receipt of the completed spreadsheet, we will then process the registrations on our local database and forward web user details accordingly. The invoicing address should be that of the 'supervisors' institute finance department and a purchase order number is required. These options can be used in combination with other programmes offered by UK NEQAS LI.

Additional license requests over 20 users per laboratory should contact UK NEQAS LI for further assistance.
